

ASX Announcement

2 March 2011

Re-release

Solomon Gold – Exploration Update (Rannes, Queensland)

Solomon Gold plc is listed on London's Alternative Investment Market (AIM) board of the London Stock Exchange, which has reporting requirements which do not accord with those of the Australian Securities Exchange (ASX).

Yesterday's release by D'Aguilar Gold Limited (DGR) entitled "Solomon Gold – Exploration Update (Rannes, Queensland)" did not satisfy all of the technical requirements of the JORC Code and the ASX (particularly those contained in Companies Update 03/07 dated 3 May 2007) in terms of the reporting of "metal equivalents".

Accordingly, D'Aguilar Gold has today re-released the announcement (attached) by reporting it in terms of its separate inferred resources for gold and silver, rather than in terms of a combined inferred gold equivalent resource.

ASX Announcement

2 March 2011

Solomon Gold – Exploration Update (Rannes, Queensland)

The Directors of D'Aguilar Gold Limited (ASX Code: DGR) are pleased to draw the attention of shareholders to the announcement of 28 February 2011 by Solomon Gold Plc (LSE (AIM) Code: SOLG) regarding the in relation the Maiden Resource Estimate at the Kauffmans-Homestead Prospect within the Rannes Project in Queensland.

HIGHLIGHTS

- Maiden Resource Estimate completed for the Kauffmans-Homestead Prospect over a 500m strike length.
- **Inferred Mineral Resource of 7.7Mt at 0.68g/t gold for 168koz of contained gold and Inferred Mineral Resource of 7.7Mt at 9.0g/t silver for 2.2Moz of contained silver** as estimated by Hellman Schofield in accordance with JORC reporting standards.
- Multiple prospects in close proximity to Kauffmans over a 1.5km strike length, providing excellent potential for a significant expansion of the existing resource inventory.
- Maiden gold resource calculations for the Porcupine Pie and Cracklin Rosie prospects within the Rannes Project are planned.
- **Drilling campaign for 2011 has been doubled to a planned 24,000m** on drill targets close to Kauffmans-Homestead.
- Gold grade and gold:silver ratio increasing with depth drives deeper exploration below 200m.
- Baseline environmental, metallurgical, crushing and grinding and process design studies to commence.

Shareholders are encouraged to read the full Solomon Gold announcement. The announcement can be viewed in full under the "Latest News" section of the Solomon Gold website: solomongold.com.

D'Aguilar Gold Limited holds 35.2 million shares in Solomon Gold, which equates to 12.5% of the issued capital.

Competent Persons Statement

The information herein that relates to Exploration Results is based on information compiled by Nicholas Mather B.Sc (Hons) Geol., who is a Member of The Australian Institute of Mining and Metallurgy. Mr Mather is employed by Samuel Capital Pty Ltd which provides certain consultancy services including the provision of Mr Mather as the Managing Director of D'Aguilar Gold Ltd (and a director of D'Aguilar Gold Ltd's subsidiaries).

Mr Mather has more than five years experience which is relevant to the style of mineralisation and type of deposit being reported and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves' (the JORC Code). This public report is issued with the prior written consent of the Competent Person(s) as to the form and context in which it appears.

About D'Aguilar Gold

D'Aguilar Gold Limited is focused on generating exploration and development companies in a wide array of minerals.

Projects are conceived directly through the skills and experience of D'Aguilar's accomplished team of exploration geoscientists (with an enviable track record), not by the costly purchase of properties. Each project or exploration strategy is held in a separate subsidiary.

Focused and specialist management is then engaged in the subsidiary, with project specific finance raised in the subsidiary – faster and less dilutive to D'Aguilar. As the subsidiary project develops and starts to derisk the subsidiary is separately capitalised (seed raisings followed by an IPO).

Investors can choose to invest specifically in a particular project/commodity, or by investing in D'Aguilar, invest in the resource company generating business which retains a significant carried interest in each project.

D'Aguilar projects tend to be very large, targeting new provinces with the potential to make world-class discoveries. The exploration concepts are often novel. While increased metal prices and advances in technology can turn former sub-economic deposits into viable projects, D'Aguilar subsidiary projects frequently emerge from detailed reassessment and reinterpretation of large databases – looking at things from a new angle and with a different focus using state of the art techniques. The D'Aguilar Directors and Managers have in the past applied new exploration models to extensive tenement areas which have led to identification of new mineral provinces and the discovery of nationally significant resources. Similar efforts are now being dedicated to D'Aguilar.

D'Aguilar Gold currently holds 52 million shares (33%) in **Mt Isa Metals Limited** (ASX: MET) embarking on an exciting gold strategy in Burkina Faso, 35.2 million shares (12.5%) in **Solomon Gold plc** (LSE: SOLG) and 58.5 million shares (53%) in **AusNiCo Limited**.

D'Aguilar is also progressing the IPO and ASX listing of **Navaho Gold Ltd** (gold and silver) which has now had its Prospectus approved by ASIC. The offer period for Navaho Gold opens on 2 March 2011.

In the development pipeline, D'Aguilar is also progressing plans for other subsidiaries – **Archer Resources Ltd** (molybdenum, copper and gold) and **Armour Energy Ltd**, an energy-focused subsidiary. Several other projects are at earlier stages of development, and will be announced to the market when exploration tenements have been secured.

D'Aguilar has 322,202,760 shares on issue.
