25 January 2012

Global Resource Development Continues

The Board of Directors of DGR Global Limited (ASX:DGR) is pleased to report the continued development of its wider resource interests with the drilling results announced this morning by Mt Isa Metals (ASX:MET) continuing the positive development of its Nabanga Gold Prospect in Burkina Faso.

These latest results also follow-on from a suite of positive drilling results released by MET earlier in the month for the same project, which has now been separated into distinct "zones" given its overall size. Exploration and further drilling continues at Nabanga with the aim of MET calculating and releasing its maiden gold resource in Q2, 2012.

DGR Global welcomes this development as a demonstrable element of its plan to continually identify, develop and retain an interest in world class resources across the globe. Other initiatives underway in which DGR Global has an interest currently include:

- Drilling activities in Nevada, USA to identify gold and silver mineralization (Navaho Gold Limited);
- Project research and identification for iron-ore in west Africa (IronRidge Resources Limited);
- The continued development of an expanding gold and silver resource at Rannes in Queensland (Solomon Gold Plc);
- The continued project and corporate development of a world-class shale oil and gas company within Australia (Armour Energy Limited, with an interest in Lakes Oil Limited).

About DGR Global Limited

DGR Global Limited is focused on generating exploration and development companies in a wide array of minerals.

Projects are conceived directly through the skills and experience of DGR Global's accomplished team of exploration geoscientists (with an enviable track record), not by the costly purchase of properties. Each project or exploration strategy is held in a separate subsidiary.

Focused and specialist management is then engaged in the subsidiary, with project specific finance raised in the subsidiary – faster and less dilutive to DGR Global. As the subsidiary project develops and starts to derisk the subsidiary is separately capitalised (seed raisings followed by an IPO).

Investors can choose to invest specifically in a particular project/commodity, or by investing in DGR Global, invest in the resource company generating business which retains a significant carried interest in each project.

DGR Global projects tend to be very large, targeting new provinces with the potential to make world-class discoveries. The exploration concepts are often novel. While increased metal prices and advances in technology can turn former sub-economic deposits into viable projects, DGR Global subsidiary projects frequently emerge from detailed reassessment and reinterpretation of large databases – looking at things from a new angle and with a different focus using state of the art techniques. The DGR Global Directors and Managers have in the past applied new exploration models to extensive tenement areas which have led to identification of new mineral provinces and the discovery of nationally significant resources. Similar efforts are now being dedicated to DGR Global.

DGR Global currently holds 52 million shares (33%) in **Mt Isa Metals Limited** (ASX: MET) currently exploring for gold in Burkina Faso, 35.2 million shares (12.4%) in **Solomon Gold plc** (LSE: SOLG) currently exploring for gold and copper in the Solomons and Queensland, 59.8 million shares (41%) in **AusNiCo Limited** (ASX: ANW) exploring for nickel sulphides, cobalt, gold and silver in south east Queensland, and 27 million shares (29%) in **Navaho Gold Limited** (ASX: NVG) exploring for Carlin style gold in Nevada (USA) and Queensland.

DGR Global is currently progressing the corporate development of **Archer Resources Limited** (focussing on copper-gold-silver porphyry systems) and **IronRidge Resources Limited**. Capital raisings and stock exchange listings for these companies are in planning for 2012.

DGR Global is also continuing to progress the development of **Armour Energy Limited** which is dedicated to the discovery and development of world class gas resources in an extensive new province in Northern Australia. The area currently under tenure / application covers in excess of 125,000km² of the McArthur, South Nicholson and Georgina Basins. Planning is well advanced for an IPO during Q1, 2012.

DGR Global currently has 324,202,760 shares on issue.
